**HELLO!**

*Welcome to the 2019-2020 Gulley Greenhouse Young Plant Catalog*

At Gulley Greenhouse we specialize in custom growing plugs and liners of perennials, herbs, ornamental grasses, and specialty annuals.

Our passion is to provide finished growers with a wide selection of high quality young plants to choose from. Having been established as a family business for over 40 years, we’re proud to consider ourselves connected to the industry. We do our best to stay at the forefront of the new technology and variety advancements that are being made every year (and every day!)

**THANK YOU**

Thanks to all of our customers for your continued support! We sincerely appreciate your orders and the confidence you’ve shown in our products and company. As always, we strive to produce quality plants perfectly suited for easy production and successful sales to the end consumer.

We’re looking forward to another great season, with lots of new varieties to offer and the same quality you’ve come to expect.

---

**PLEASE SEE GENERAL INFORMATION ON PAGE 2.**

---

**LEGEND**

- Camera icon denotes that an image is displayed of the selected variety

**HEIGHT / WIDTH**
Indicates the height or width of the mature plant.

**BLOOM SEASON**
The time of year to expect blooming: SP: Spring, SU: Summer, F: Fall, E: Early, L: Late (EF = Early Fall)

**LIGHT**
- O = Full Sun
- ⚪ = Part Shade
- ● = Full Shade

**ZONE**
Indicates the general USDA hardiness zone.

**TRAY SIZE / LEAD TIME**
Will generally be noted as: • 96 (8 weeks)
GENERAL INFORMATION

WHERE IS GULLEY GREENHOUSE?
Our greenhouse is located in Fort Collins, Colorado which is about 60 miles (1 hour) north of Denver. Denver International Airport is the closest major airport to our facility. Please see aerial photo overview on page 5.

PRICES:
Our young plants are sold exclusively through our horticultural broker network, so please contact the broker of your choice for current pricing. Our complete broker listing can be found on page 4.

Many varieties are patent protected and have associated royalty fees, royalties, and required tags. Your broker can also provide this information.

DISCOUNTS:
• 2% Early Order Discount: All orders placed before Friday October 11, 2019 will automatically receive an Early Order Discount of 2%. The EOD will be applied in addition to any applicable volume discount, up to 7%. Several specific items are not eligible for the EOD, please check with your broker.
• Volume Discounts: Volume discounts are available on a per-order basis. Orders can span multiple ship weeks but must be placed at the same time. Specialty Perennials and Fairy Flowers® are not eligible for volume discounts.
  • Perennial Volume Discount: Applies to all sizes of Perennials, Herbs, and Grasses
    50+ trays: 3% discount
    100+ trays: 5% discount
    150+ trays: 7% discount.
  • We are happy to offer a custom quote on orders larger than 200 trays.

ORDERS / LEAD TIMES:
To ship your order complete, we need it at least 1 week prior to the longest lead time for each variety (listed by each plant in the catalog).
• Except when ordering off availability, all orders are custom grown to the lead time listed in the catalog. Any cancellations or changes to custom grown orders will not be accepted after plants have been sown or stuck, according to their specific lead time.
• Custom 32cell and 50cell vernalized liner orders must be placed by August 1, 2019. Due to vernalization and growing space requirements, we will not be able to add to our 32cell production after this date. Please see page 18 for more information.
• Plants noted as ‘availability only’ are in short supply or have a very long lead time, so we may not be able to guarantee a specific ship date. But, we’ll put you on the list and call when plants are available!

MINIMUMS:
• Our minimum for 196, 96, 50, and 72 tray sizes is one standard 4-tray box (22”x12.5”x18”). Tray sizes can be combined to fill a box. Pull & Pack may be available for larger Cordyline and Anigozanthos orders, please call for options.
• 25cell Fairy Flower® trays are packed 12 to to a box, three per level. Please order in increments of 3 trays. See page 9 for more information regarding the Fairy Flowers® program.
• The 32cell minimum is 1 box, most often packed 3 trays to a box with dimensions of 22”x12.5”x18”. Please see page 18 for more information on our 32cell program.

TAGS:
• Picture tags are available to ship with all varieties but most will not automatically ship; please ask your broker for specific tag pricing.
• Several patent protected varieties require a tag to be purchased with the plants; your broker will have prices and a list of these varieties as well.
• There are many companies that have removed the requirement for tags to be shipped with plants. All varieties licensed by Darwin Perennials, Dummen Orange, GreenFuse, Must Have Perennials, Plant Select and TerraNova still require tags, but tags are no longer mandatory to ship with plants. Growers are now able to provide their own tags in accordance with the licensor’s guidelines and with licensor’s approval. Please keep this in mind when ordering tags that they will no longer automatically be added to orders for those varieties.
• Don’t forget to order tags...tag orders not accompanying the liners will be assessed a $10.00 handling charge.

SHIPPING:
Please tell us how you want your plants to be shipped! You are the best judge of shipping methods to your area, so please inform your broker. All shipping is FOB Gulley Greenhouse, Fort Collins CO.
• Boxes, inserts, packing, racking, handling, transportation to airports, and transfer fees will be included into one simple flat fee per tray, regardless of size or how many trays are on the order.
• Shipments can be scheduled via air, FedEx, FedEx Freight, and UPS (at customer risk and request). Please let us know if you would like to ship on your company’s account.
• Large orders may be palletized if applicable; we want to get you the best option on freight!

CLAIMS:
Gulley Greenhouse must be notified within 72 hours upon receipt of plants if you have shipping or quality concerns. No claims will be honored unless notification is made within this time limit and accompanied by a picture. Please notify your broker IMMEDIATELY with any problems.

THANK YOU...
We sincerely thank you for choosing Gulley Greenhouse. If you do not see what you are looking for in this catalog or have any other questions, please don’t hesitate to call us. We look forward to the opportunity to work with customers like you in the business we love...plants!

RESPONSIBLY GROWN NEONICOTINOID FREE!
ALL of our young plants are grown responsibly, without using chemicals that contain neonicotinoids. In fact, our growers are employing the help of many beneficial insects in our greenhouses these days!
Join us in the cause to protect bees and our environment!
A SIZE FOR EVERY NEED

TRAY SIZES:
Since every grower is unique, we offer multiple tray sizes to give you options based on your specific needs and preference. Almost every variety on our list is grown in a 98-cell tray, with many perennials having the option of 200-cell, 72-cell, 50-cell, and 32-cell trays as well. Specialty annuals are most likely grown in larger 72-cell or 50-cell liners.

We are happy to custom grow in any size tray at your specific request with enough lead time.

WHAT TRAY SIZE IS RIGHT FOR YOU?

• Savings on Freight
  For our customers that regularly purchase 72-cell trays, the 98-cell liner is very close to the same size but contains 26 more plants per tray. This will add up to a huge savings on freight!

• Mass Production Potential
  For our customers that regularly purchase 128-cell trays, we offer a comparable 200-cell tray. This makes major economical sense for growers that are producing larger quantities of 2.5” to 4” finished containers.
  Almost all groundcover varieties we list will be offered in the 200-cell size, perfect for planting into cell packs with a quick turn-around time.

• Rapid Finish Option
  Consider a 50-cell or 32-cell liner if you are looking to finish a gallon or 2-gallon pot quickly without as much growing time. Our large liners have been bulked and cooled and will finish a gallon in 4-8 weeks depending on growing conditions.

• Increased Plant Health
  Compared to a 128-cell tray, our 98-cell size has better airflow and more soil volume per cell, offering the benefits of a larger plant with a more vigorous root system.

As finished growers ourselves, we have been experimenting with different sized trays throughout the years. We think this assortment of sizes spans the many needs that you, the finished grower, encounters every season.

We appreciate any feedback you might have about our sizes!

WHAT ARE FAIRY FLOWERS?
The plants in the Fairy Flowers® line have been selected because they naturally stay small or can be easily trimmed to stay tiny. These foliage plants and flowers thrive as outdoor plants in the height of the growing season, and as indoor plants the remainder of the year. With proper pruning and care, Fairy Flowers® are designed to flourish in small spaces indefinitely.

There are three series within the Fairy Flowers® line: Original Fairy Flowers®, Gargoyle™ Succulent Fairy Flowers® and Terrarium Fairy Flowers®.

• **Original Fairy Flowers®**: A collection designed to be planted inside or outside. Full of beautiful flowers, foliage colors and textures.

• **Gargoyle™ Gardening Succulent Fairy Flowers®**: Unique succulent varieties add a prehistoric touch, perfect in warm dry environments.

• **Terrarium Fairy Flowers®**: Plants selected to thrive in heat and humidity, shade and indoor tropical environments.

Each plant comes with a beautiful tag that introduces gardeners to both the fairy and the flower he or she has created. With custom artwork and unique stories for every plant, customer’s will want to get to know each and every one!

AVAILABILITY, SIZES AND VARIETIES
All varieties can be custom grown for lead time (listed for each tray size on the following pages). Select 25 & 96 cell trays will be on availability at certain times of the year. Availability is not guaranteed however, so it is recommended to place orders as early as possible. The 196 tray size must be custom grown for lead time.

MINIMUMS AND PACKING
• 25cell tray: 3 tray minimum. Must order in increments of 3 (packed 3 in a single box, 12 in a full box).

• 96cell tray: 4 tray minimum, (packed 4 to a box).

• 196: 4 tray minimum, (packed 4 or 6 to a box).

QUESTIONS?
Please call our main wholesale office at 1.800.642.8028, send us an email at gulleyg@gulleygreenhouse.com, or visit our website at www.fairyflowers.com.

For pricing and to place an order, please contact us or your favorite horticultural broker. See page 4 for our complete broker listing.
PROGRAM DETAILS

SIZES:
The majority of our specialty annuals are available in the 72-cell size, with selected varieties available in 96-cell, 50-cell and 32-cell liners. Not all varieties are produced year-round, in fact most are based on pre-booked speculation. Please check with us for availability and potential ship date windows.

PRICES:
Please contact your horticultural broker for prices and to place an order. Or send your order directly to us and we will recommend a broker salesperson to facilitate the sale.

Specialty annual orders are not eligible for the Early Order discount or volume discounts, but we are happy to provide a custom quote for large quantities. Please talk to your broker.

NEW VARIETIES:
We have added several interesting new varieties to our 2020 line-up! Look for the ‘New’ icon throughout the catalog to find these new 2020 additions.

PULL & PACK SHIPPING OPTION:
Select Cordyline and Anigozanthos varieties have the option to be shipped out of their trays (pull & pack) to fit more trays in a single box. Our growers will determine if the crop is well-rooted enough to be eligible for this method of shipping. Please let our sales office know if pull & pack is an option that you would like to pursue.

QUESTIONS?
Please call our main wholesale office toll-free at 1-800-642-8028 or send us an e-mail at gulleygh@gulleygreenhouse.com.
NEW! **ALSTROEMERIA 'Inca' Series**

- **Height:** 10”-12”  
- **Width:** 10-12”  
- **Light:** ☀
PERENNIALS

PROGRAM DETAILS

SIZES:
Perennials are available in 200-cell (sold as 196), 98-cell (sold as 96), or 72-cell sizes, depending on the variety. A majority of varieties are also available in a vernalized 50 or 32-cell large liner (varieties listed on page 19).

PRICES:
Please contact your horticultural broker for pricing and to place an order. Or send your order directly to us and we will recommend a broker; our complete broker listing is on page 4. Additional patent fees, royalties, and tag & marketing fees may apply and will also be available from your broker. Also please see Volume and Early Order Discount information on page 2.

NEW VARIETIES:
We have added tons of interesting new varieties to our 2020 line-up! Look for the ‘New’ icon throughout the catalog to find these hot new 2020 additions.

AFFILIATIONS:
We are closely affiliated with several brands and plant breeders; please see page 5-7 for variety listings.

VERNALIZATION:
Most of our perennials are first-year blooming and do not require vernalization. If you have questions about which varieties will need to be vernalized for spring flowering, please give us a call and we can help you put together a program. All of our 50-cell and 32-cell liners are vernalized and ready to pop into a gallon for spring sales.

QUESTIONS?
Please call our main wholesale office toll-free at 1-800-642-8028 or send us an e-mail at gulleygh@gulleygreenhouse.com.

Camera icon denotes that an image is displayed of the selected variety
VERNALIZED 50’S and 32’s
Our 50-cell and 32-cell program includes a wide selection of perennials that are bulked, cooled, and are bursting with stored energy come spring! You will receive a nicely rooted pre-finished liner ready to move up into a larger pot size. This treatment dramatically reduces overall crop time in the finished container.

AVAILABILITY AND VARIETIES
All of the varieties on the following list will be grown on availability, ready to ship in January 2020 through April 2020 (week 2 - week 17). Orders will be taken on a first-come, first-serve basis.

If you see a variety within the main catalog that is not offered as a 50-cell or 32-cell (on these pages), we may be able to custom grow it for you. Please check with us for a custom quote! Order minimums and lead times will apply. Custom grow orders will not be accepted after August 1, 2019 due to production, space & vernalization requirements.

PRICES
Please contact your broker for pricing and to place an order. Or send your order directly to us and we will recommend a broker salesperson to facilitate the sale.

DISCOUNTS
• 32-cell orders can be combined with other perennial sizes towards the perennial volume discount (see page 2 for more info).
• We offer a 2% Early Order Discount for all orders placed before October 11, 2019.

TAGS
Some varieties require tags, please contact your broker for required lag and royalty information. For plants that do not require tags, picture tags are available to add to your order. Please let us know if you want to add tags!

SHIPPING
32-cell trays are shipped 3 trays per box. Each tray weighs 8-10 pounds, (approximately 24-30 lbs per box). 50-cell trays are shipped 4 trays per box, with a full box weight of 25 lbs per box. Box dimensions are 22”x12.5”x18” for both sizes.

These plants have been maintained in cold conditions, so they can be shipped by ground freight at customer’s risk. Other methods can be used if preferred, please let us know. Please be advised that UPS will not honor claims for any reason!

All boxing, packing and handling costs will be included in one flat fee per tray, regardless of size or how many trays are on the order. We ship by Tuesday of each week to ensure that plants arrive before the weekend. Please see page 2 for more shipping information.

MINIMUM
32-cell: 1 case per shipment (3 trays of 32).
50-cell: 1 case per shipment (4 trays of 50).

CLAIMS
Please see page 2 for claim protocol.

THE BENEFIT OF LARGER LINERS
Let us do some of the work for you!
Each 50-cell and 32-cell liner is given at least 10 weeks to root (and receive a cold treatment if necessary per that variety).

Planting from larger liners will reduce your finish times in the spring. Plan on 4-6* weeks to finish a gallon, and 2-3* weeks to finish a quart. (*Finish times may vary depending on your specific size selected, growing environment and temperatures).
### 2019-20 Variety Selection

**32-cell ECHINACEA**

Leilani
ACHILLEA

ACHILLEA ageratifolia ‘Greek’  Short, gray-green creeper with white flowers.  *96* (6 weeks)
Zone: 3-9  Height: 4"-6"  Light:  Bloom Season: SU

ACHILLEA ‘Little Moonshine’  Same bright golden-yellow flowers as ‘Moonshine’, but with a compact and easy to manage habit.  Day-length neutral breeding means earlier blooming.  Must Have Perennials ‘ACB2002’ PPAF 8179.
Zone: 4-8  Height: 9"-12"  Light:  Bloom Season: SU/EF.

ACHILLEA millefolium ‘Desert Eve™’ Series: Compact series of 6 strong colors features sturdy plants that are very early to bloom.  Syngenta Flowers.  Perennials PP#20741.

‘Desert Eve™ Deep Rose’  Deep true yellow.  *96* (6 weeks)  *96* (Avail only)  *96* (Avail only)
Zone: 4-8  Height: 10"-12"  Light:  Bloom Season: LSP/EF.

‘Desert Eve™ Red’  Deep ruby red.  *96* (6 weeks)  *32* (Avail only)
Zone: 4-8  Height: 10"-12"  Light:  Bloom Season: SU/EF.

‘Desert Eve™ Terracotta’  Salmon/peach.  *96* (6 weeks)  *32* (Avail only)
Zone: 4-8  Height: 10"-12"  Light:  Bloom Season: SU/EF.

‘Desert Eve™ Yellow’  Deep true yellow.  *96* (6 weeks)  *32* (Avail only)
Zone: 4-8  Height: 10"-12"  Light:  Bloom Season: SU/EF.

ACHILLEA millefolium ‘Paprika’  Orange-red blooms have golden center.  Very drought tolerant.  Perennials PP#20741.
Zone: 4-8  Height: 24"  Light:  Bloom Season: SU/EF.

ACHILLEA millefolium ‘Pink Grapefruit’  Large, lavender-pink flowers on a tidy compact vase-shaped habit.  Must Have Perennials PP#20741.
Zone: 4-8  Height: 20"-24"  Light:  Bloom Season: SU/EF.

ACHILLEA millefolium ‘Song Siren™’ Series: Non-fading large blooms on dependable, compact plants.  Abundant flowers make a good season extender for retail sales.  Darwin Perennials.
Zone: 4-8  Height: 14"-16"  Light:  Bloom Season: ESU/EF.

‘Song Siren™ Angie’  Dark carmine-rose flowers.  *96* (6 weeks)
Zone: 4-8  Height: 15"  Light:  Bloom Season: SU.

ACHILLEA millefolium ‘Song Siren™’ Series (continued):

‘Song Siren™ Layla’  Abundant violet flowers.  *96* (6 weeks)
Zone: 4-8  Height: 14"-16"  Light:  Bloom Season: SU/EF.

ACHILLEA millefolium ‘Strawberry Seduction’  Bright red flowers with golden centers.  Vigorous, but not too tall.  Must Have Perennials PP#18401.
Zone: 4-8  Height: 15"-20"  Light:  Bloom Season: SU/EF.

ACHILLEA millefolium ‘Wonderful Wampee’  Blooms start as dark pink and slowly fade to a light blush color.  Must Have Perennials PP#18760.
Zone: 4-8  Height: 14"-16"  Light:  Bloom Season: SU/EF.

ACHILLEA tomentosa ‘Goldie’  Long-flowering golden yellow flowers above ground hugging foliage.  Perennials PP#18760.
Zone: 4-8  Height: 6"-8"  Light:  Bloom Season: SU.

ACHILLEA x ‘Moonshine’  Soft, feathery, gray-green foliage is complimented by buttery yellow panicle flowers.  A classic!
Zone: 4-8  Height: 19"-24"  Light:  Bloom Season: SU.

AEGOPODIUM

AEGOPODIUM podagraria ‘Variegatum’  Massing groundcover with variegated green and white foliage.  White panicle flowers in summer.  Limited availability.
Zone: 4-8  Height: 6"  Light:  Bloom Season: SU.

AGASTACHE

Zone: 4-8  Height: 15"  Light:  Bloom Season: SU.

72 (Avail only) 32 (Avail only)

LUPINUS continued on next page
LUPINUS polyphyllus ‘Westcountry’ Series: This spectacular series features extra-strong plants from tissue culture that produce an incredible show of flower spikes in very unique colors. Unlike regular lupine, these stunning plants are large and should be featured in a premium large container (2gal or larger). Limited availability through fall 2019, with vernalized options in spring 2020. Please place orders as early as possible; see additional grower and cultural information on availability through fall 2019.

- **LUPINUS polyphyllus ‘Westcountry Blacksmith’**: Bicolor blossoms feature deep, dark purple blossoms highlighted by crisp white caps. Flower spikes are dense and stunning! Must Have Perennials PP#29943.
- **LUPINUS polyphyllus ‘Westcountry Desert Sun’**: Incredibly tall flower spikes mature from tight white buds to lemon yellow, then finally into pure sunny yellow when flowers are fully open. Must Have Perennials PP#23073.
- **LUPINUS polyphyllus ‘Westcountry Magic Lantern’**: Just like its name, Magic Lantern has a bit of mystery behind each flower. Yellow and gold inner petals blend and swirl into deep, dark purple outer petals. A truly magical combination of colors. *Limited availability in 2019. Must Have Perennials PP#29860.*
- **LUPINUS polyphyllus ‘Westcountry Manhattan Lights’**: The lights are sparkling in this outrageous combination of true purple and bright yellow bi-color blooms. Must Have Perennials PP#18986.
- **LUPINUS polyphyllus ‘Westcountry Masterpiece’**: A profusion of rich, wine-violet colored flower spikes in spring. A color very unique to this series not found in other lupine. Must Have Perennials PP#19739.
- **LUPINUS polyphyllus ‘Westcountry Terracotta’**: Tall, iridescent blood red flower spikes bloom in late May through early June. Finished plants have been seen to have up to 7 spikes on one plant! Must Have Perennials PP#15709.
- **LUPINUS polyphyllus ‘Westcountry Tequila Flame’**: Rightly named, Tequila Flame is on fire! Bright true-red petals alternate with soft yellow on extra tall spikes, creating a fiery display of flames in the garden. Darker red-tinged foliage compliments this variety very nicely. Must Have Perennials PP#23047.
- **LUPINUS polyphyllus ‘Westcountry Terracotta’**: Outer petals open a dark, dusty peach color and lighten with age, while yellow petals closer to the stem make the large flower spikes glow from within. Because of the color change this variety has an extremely unique look when flowers are opening through the season. *Limited availability in 2019. Must Have Perennials PP#23044.*

NEW! ‘Westcountry’ Mixed Tray: For smaller orders of one to two trays, at least three colors will be mixed into one tray to ensure each customer gets a good sample of colors. Must Have Perennials.
LYCHNIS CAMPION, MALTESE CROSS

LEMON BALM  MELISSA OFFICINALIS

LEMON BALM  Attractive, light green leaves. Plant serves as fragrant background to the perennial border.
Zone: 4-9  Height: 36”  Light: ∅

LEMON GRASS  CYMBOPOGON CITRATUS

LEMON GRASS (West Indian)  Blades are packed with strong lemon-citrus flavor, used in Asian cooking. Clumping.
Zone: 9-11  Height: 24”-48”  Light: ∅

LEMON VERBENA  LIPPIA CITRIDORA

LEMON VERBENA  Semi-evergreen leaves have a strong lemon scent. Grows best in a container with bright light.
Zone: 8  Height: 24”  Light: ∅

MARJORAM  ORIGANUM MAJORANA

MARJORAM 'Sweet' (Green)  Leaves with a spicy scent flavor meats, poultry, fish, stuffing and sauces.
Zone: 7-10  Height: 12”  Light: ∅

MINT  MENTHA SP.

MINT 'Apple' (M. rotundifolia)  Large, woolly green leaves, sweet apple mint scent. White flowers.
Zone: 4  Height: 12”-24”  Light: ∅

MINT 'Chocolate' (M. spp.)  Bronzy-green leaves have a mint-chocolate fragrance. A hit with children!
Zone: 4  Height: 12”-24”  Light: ∅

OREGANO  ORIGANUM SP.

OREGANO 'Common' (Origanum vulgare)  Creeping, dark green foliage with pink flowers July-Sept.
Zone: 4  Height: 12”  Light: ∅

OREGANO 'Golden' (Origanum vulgare aureum)  White flowers with creeping yellow/green foliage. Great accent.
Zone: 4  Height: 12”  Light: ∅
OREGANO ORIGANUM SP. continued

OREGANO 'Greek' (Origanum vulgare 'Greek') Large, dark green, pungent leaves. More upright growth habit.
Zone: 4 Height: 16”-24” Light: O

OREGANO 'Hot & Spicy' (Origanum vulgare) One of the best tasting oreganos! The hot and spicy flavor makes this a great addition to any herb garden.
Zone: 4 Height: 12”-18” Light: O

OREGANO 'Italian' (Origanum onites) Small, light green leaves. Has a sweeter flavor than other oreganos.
Zone: 4 Height: 24” Light: O

OREGANO 'Mexican' (Lippia graveolens) Most commonly used herb for commercial dried oregano.
Zone: 7 Height: 12”-24” Light: O

PARSLEY PETROSELINUM SP.
Leaves with celery scent are commonly used as a garnish to meat dishes. Also used to flavor potatoes, soup, and fish dishes.

PARSLEY 'Curled' (P. crispum) Curled, dark green leaves have celery flavor. Use leave ms.
Zone: 5 Height: 12” Light: O

PARSLEY 'Italian/Flat' (P. neapolitanum) Flat leaves with stronger flavor, superior in cooked dishes.
Zone: 5 Height: 18” Light: O

ROSEMARY ROSEMARINUS SP.
Evergreen plant with pale blue-lavender flowers; tolerates poor soil. Sharp pine-scented leaves flavor meats, vegetables, poultry, stuffing, bread, tea, vinegar, and butters. Flowers and leaves used in potpourri and soaps.

ROSEMARY 'Arp' (R. officinalis) Tender perennial, but more hardy than other officinalis varieties.
Zone: 6-10 Height: 12”-36” Light: O

ROSEMARY 'Barbecue' (R. officinalis) Upright grower with stiff stems that make it ideal for skewers.
Zone: 8-10 Height: 36”-48” Light: O

ROSEMARY 'Regular' (R. officinalis) Used as a fragrant hedging plant; light blue flowers.
Zone: 7-10 Height: 24” Light: O

ROSEMARY 'Tuscan Blue' (R. officinalis) Upright habit can be trained as a hedge. Bright lavender-blue flowers.
Zone: 8-10 Height: 36” Light: O

ROSEMARY 'Weeping' (R. officinalis 'Prostrata') Trailing dark green foliage with pale blue-lavender flowers.
Zone: 8-10 Height: 6” Light: O

RUE RUTA GRAVEOLENS

RUE Shrubby evergreen with blue-green, fern-like foliage. Bitter leaves are used to make disinfectants. Yellow flowers bloom June through August. Don’t plant near other vegetables as it makes the soil bitter too!
Zone: 4-10 Height: 36” Light: O
Spicy, peppery leaves flavor meat, fish, poultry, potatoes, and vegetables.

**SAVORY** *Satureja sp.*

- Zone: 3-8
- Height: 12”
- Light: ☀️

**SAGE** *Salvia sp.*

**SAGE ‘Berggarten’** (*S. officinalis*) Large, round, gray-green leaves. Good as landscape plant also.
- Zone: 6
- Height: 24”
- Light: ☀️

**SAGE ‘Garden’** (*S. officinalis*) Violet flowers in June; wooly gray leaves look good in landscape.
- Zone: 6
- Height: 24”
- Light: ☀️

**SAGE ‘Golden Icterina’** (*S. officinalis*) Golden variegated leaves; ornamental AND edible!
- Zone: 6
- Height: 24”
- Light: ☀️

**SAGE ‘Pineapple’** (*S. rutiland*) Scarlet flowers with pineapple-scented leaves. Use in salads or butters.
- Zone: 8
- Height: 36”
- Light: ☀️

**SAGE ‘Purple’** (*S. officinalis purpurea*) Same wonderful sage flavor as straight officinalis, but with deep blueish-purple foliage. Stunning in the landscape!
- Zone: 6
- Height: 18”
- Light: ☀️

**SAGE ‘Tricolor’** (*S. officinalis*) Showy variegated maroon, green, & white foliage. Flavor is similar to garden sage.
- Zone: 6
- Height: 24”
- Light: ☀️

**STEVIA** *Rebaudiana*

A tropical plant with bright green leaves and small clusters of white flowers. Sometimes called the “sugar herb”, leaves are much sweeter than table sugar. A natural sweetener with no calories!
- Zone: 10-11
- Height: 5”-8”
- Light: ☀️

**TARRAGON** *Artimisia dranclus*

Commonly used in French cooking, leaves flavor steaks, seafood, poultry, sauces, marinades, and vinegars.
- Zone: 4-9
- Height: 24”
- Light: ☀️

**THYME** *Thymus sp.*

Aromatic leaves are used in potpourris, herbal remedies, and cuisine depending on the variety.
- Zone: 5-9
- Height: 8”-12”
- Light: ☀️

WESTCOUNTRY LUPINES

GENERAL INFORMATION

- Production: Excellent for larger 2 to 3 gallon containers; large flower spikes closely packed with individual bells, strong and unique colors. Although they are a hardy perennial to zone 4, this series will shine as a pot crop with a huge impact on display at retail. The massive display of flowers will also support a much higher price point than normal lupine varieties.
- Hardiness: Tested to USDA Zone 4
- Foliage: Soft green to grayish-red, the finger like leaves make whirls at the top of the leaf stems.
- Flower Color: Ten color assortment of solids and bi-colors; see images of all varieties on page 88.
- Flowering Time: Late April to Early June.
- Flowering Height: 24-36” spikes of single flowers.
- Use for: Cottage/landscape garden effect in borders, premium patio/container centerpiece.
- Landscape Culture: Sun, partial shade; moderately fertile light soils that are slightly acidic (Lupines dislike limey soils).
- Protected: Must Have Perennials EU and USA; the breeder asserts ownership of all rights in this plant.
- Availability: 72cell liners will be available starting in wk34, 2019. 32cell liners available starting in wk2, 2020. Please contact your broker sales rep for pricing information.

GROWER INFORMATION

PLANTING AND CROP TIMING

- With an overall width of 24” to 30”, this series should be treated as a large and premium crop due to their size and price point.
- We recommend that growers plant (1) 72cell liner in a 2-gallon pot in late summer to early fall. Westcountry lupine create the biggest display when bulked through the fall and winter months and allowed to bloom with the natural spring season of the location they’re grown at. The more time given to bulk at cool temperatures, the more impressive the flower display.
- The Westcountry lupine can also be planted into finished containers from cooled/vernalized liners in the spring, but the key is bulk ing. The larger the root system and the more crowns above the soil, the more flower spikes that will bloom in the spring.

TEMPERATURE AND LIGHT

- When actively growing or bulk ing, maintain night temperatures of 45°F or higher. When the plants are well-rooted and the foliage reaches the edge of the finished container, cool the temperatures down to 30-40°F nights. Lupine love cold!! But it is also best to keep the crop above 25°F to avoid complete dormancy.
- Vernalization is beneficial; the more time given to bulk at temperatures below 40°F, the more flower spikes will emerge. The Westcountry are not day-length neutral so will bloom in spring as days become longer.
- The Westcountry series will do best grown in full sun to part-shade conditions.

PINching AND PGR’S

- Do not pinch the new growth (crown) at the center of the plant. It is best to control plant growth with temperature. Cool them down to slow them down, warm them up to speed them up! Lupines respond very quickly to increases or decreases in temperature.
- A paclobutrazol PGR drench can also be applied to help maintain desired height, especially as temperatures increase in spring.

MEDIA, IRRIGATION AND FERTILIZATION

- Soil media in the finished pot needs to be porous, with excellent drainage. Maintain a pH on the acidic side, but not lower than 5.8.
- Liquid feed at 100ppm nitrogen during the bulking stage, but make sure the fertilizer used is low in phosphorus.
- Plants can be grown evenly moist but not wet. Be very careful about watering if the plants are kept on the colder side; though the plants will require some supplemental water, avoid overwatering as crown rot is possible.

PESTS AND DISEASES

- After potting into the final container, apply a preventative fungicide drench.
- Other diseases that could be an issue such as Anthracnose and Powdery Mildew can easily be controlled with a fungicide spray.
- Clean up any dead leaves to prevent rot and disease issues.
- Insects that affect lupines include Aphids and Leaf Miner. Scouting for any issues along with a preventative drench and spray program should help prevent most pest infestations and diseases.
UNIFORMITY AND VIGOR

- Because they are from tissue culture, the Westcountry Lupine series is extremely stable, uniform and vigorous.
- Growers are recommended to plant one 72cell liner directly into a finished container, 2 gallon or larger.
- Under the right conditions, plants will fill out the finished container within 8 - 10 weeks. But keep in mind, they need cold to set flowers so cool down once the pots are filled to the edges.
- It is important to keep the dense crowns clean from debris during the cooling and bulking period.
- Varieties bloom very uniformly across each color, sending up one large bloom first. Secondary blooms will begin to form shortly after which gives these plants a very long shipping window.
