ORDERING INFORMATION

Prices in this catalog are effective from November 1, 2020 through October 31, 2021. To place an order, please call, fax, or e-mail our sales staff. We request 24-hour notice for customer pickup orders, and at least 48-hour notice for orders to be delivered. We are happy to service walk-in customers; just go to the Wholesale Sales Office. Please, no order changes or cancellations without prior communication with our sales staff.

ORDERING FROM AVAILABILITY

All products that we grow will be available as they are stashed and ready to sell, which includes our entire selection of perennials, herbs, veggies, hanging baskets, containers and bedding plants.

Availability is first-come, first-serve. If orders are received concurrently, availability will be divided fairly between each.

To ensure you get the best prices possible, all customers that want to purchase full flats quantities should place a wholesale order with the sales staff. Then the plants will be pulled for you and you will be charged the lower wholesale price. Plants may also be available to purchase through our retail garden center, but these orders are independent of wholesale orders and are subject to the pricing, terms and conditions of the retail division.

Availability orders must ship within 7 consecutive business days of receipt of the order (including Saturdays). This allows us to book the best, premium quality that you can depend on at the time you receive your order. *For example, an order placed on Tuesday May 4th must ship by the next Tuesday May 11th.*

Availabilities will be updated twice a week, Monday mornings and Thursday mornings. Please visit our website to see the most current files: <https://www.gulleygreenhouse.com/wholesale-finished-plants>. You'll also find a link to sign up for our wholesale email availability newsletter there. Please return the availability files to us via email or fax, and please print clearly!!

Our team is working hard to schedule availability that will be ready for the Front Range spring season, and also a fresh wave for the later mountain season. Our goal is to keep a constant supply of new product consistently available so that there will be good options for everyone.
